### DAVENPORT HOUSE

#### The Garden and You

All good gardeners know a garden does not care for itself.

It takes weeders, pruners, planters, mowers, fertilizers and in our case volunteers and donors.

If you would like to see this garden maintained your contributions are welcome.

See a staff member for further information about how you can help.

# Many of Our Garden Plantings

are seasonal. Plantings are seasonal. Savannah's location (zone 8b) is in the Coastal Plain along the Savannah River. The climate is categorized as temperate tropical. On average, there are 216 sunny days per year in Savannah. The July high is around 92 degrees with high humidity. The January low is 39. Savannah's soil is fertile and friable and the water table high, but drainage is very good.
